

Residential Pricing Engine Manual

A practical guide for setting residential cleaning prices with examples, formulas, time estimates, add-ons, and review rules.

Purpose

The residential pricing engine helps users create repeatable house-cleaning prices from common home details instead of guessing every quote manually.

- Start with a base price by home type.
- Adjust for square footage, bedrooms, bathrooms, and levels.
- Apply service type, condition, first-clean surcharge, and frequency discounts.
- Add extras such as oven, fridge, windows, baseboards, laundry, and pet hair.
- Estimate time on site for proposals and scheduling.

Plain-language client explanation

Your price is based on home type, size, bedroom and bathroom count, condition, service type, frequency, and requested add-ons. Recurring service is priced differently from one-time or deep cleaning because maintenance visits are more predictable after the first clean.

Key Pricing Terms

Input	Value	Why it matters
Home type base price	Condo: \$160	The starting price before adjustments.
Square-foot bracket	1,001 to 1,500 sqft: +\$30	Larger homes take more time.
Bathroom adjustment	Full bath: +\$28	Bathrooms are detail-heavy and usually drive time.
Condition multiplier	Heavy: 1.28x	Harder homes need more time and product.
Service multiplier	Deep clean: 1.38x	Deep cleaning includes more detail than maintenance.
Frequency discount	Weekly: 12%	Recurring maintenance is more predictable.
Minimum price	\$160	Protects small jobs from being underpriced.

Pricing Flow

1. Start with home type base price
2. Add square-foot bracket adjustment
3. Add bedroom adjustment
4. Add bathroom adjustment
5. Add level adjustment
6. Apply condition multiplier
7. Apply service type multiplier
8. Apply first-clean surcharge if applicable
9. Apply recurring frequency discount
10. Add selected add-ons
11. Enforce minimum price
12. Flag manual review if needed

Step 1: Base Pricing

Base pricing anchors the residential quote by home type.

Input	Value	Why it matters
Apartment	\$140	Usually smaller and faster to clean.
Condo	\$160	Often moderate size and simpler layout.
Townhouse	\$175	Usually more levels and stairs.
Single family	\$190	Often more rooms, surfaces, and levels.
Minimum price	\$160	Protects travel, admin, and setup cost.

Step 2: Square-Foot Brackets

Square-foot brackets adjust price without requiring users to manually calculate every extra foot.

1,200 sqft condo
Condo base price: \$160
Square-foot bracket up to 1,500 sqft: +\$30
Subtotal: \$190

Step 3: Bedrooms, Bathrooms, and Levels

Input	Value	Why it matters
Bedroom adjustment	3 bedrooms: +\$35	Bedrooms add surfaces and reset time.
Full bathroom	+\$28 each	Full bathrooms require more detailed cleaning.
Half bathroom	+\$16 each	Half bathrooms are smaller but still detail-heavy.
Levels	2 levels: +\$20	Stairs and split layouts add effort.

3 bedrooms, 2 full bathrooms, 1 half bathroom, 2 levels
 Bedroom adjustment: +\$35
 Full bathrooms: 2 x \$28 = +\$56
 Half bathroom: +\$16
 Level adjustment: +\$20
 Total room/level adjustment: \$127

Step 4: Condition Multiplier

Condition adjusts the quote based on actual cleaning difficulty.

Input	Value	Why it matters
Light	0.92x	Well-maintained home.
Standard	1.00x	Normal expected condition.
Heavy	1.28x	More buildup, product, and detail time.

Subtotal before condition: \$317
 Heavy condition multiplier: 1.28
 Condition-adjusted price: $\$317 \times 1.28 = \405.76

Step 5: Service Type Multiplier

Input	Value	Why it matters
Recurring standard	1.00x	Maintenance cleaning.
One-time standard	1.12x	No recurring maintenance discount behavior.
Deep clean	1.38x	More buildup and detail cleaning.
Move in / out	1.48x	Empty-home detail and inside surfaces.
Turnover	1.16x	Short-term rental or reset style work.
Post construction	1.75x	Dust, debris, repeated wiping, and review risk.

Condition-adjusted price: \$405.76
 Deep clean multiplier: 1.38
 Service-adjusted price: $\$405.76 \times 1.38 = \560.00

Step 6: Frequency Discounts

Input	Value	Why it matters
Weekly	12%	Maintenance is easier and more predictable.

Input	Value	Why it matters
Biweekly	8%	Still recurring, but more buildup than weekly.
Every 4 weeks	3%	Small discount for recurring work.
One-time	0%	No recurring maintenance discount.

Recurring standard price before discount: \$240
 Weekly discount: 12%
 Final recurring visit price: $\$240 \times 0.88 = \211.20

Step 7: First-Clean Surcharge

First-clean surcharge helps avoid undercharging the first visit for new recurring clients.

Recurring standard price: \$211.20
 First-clean surcharge: 15%
 First clean price: $\$211.20 \times 1.15 = \242.88

Step 8: Add-Ons

Input	Value	Why it matters
Inside fridge	\$25, 20 min	Extra appliance detail.
Inside oven	\$30, 25 min	High-effort appliance detail.
Inside cabinets	\$45, 40 min	Common move-in/out extra.
Interior windows	\$6/window, 6 min each	Unit-based pricing.
Blinds	\$8/room, 8 min each	Room-based dusting/detail.
Baseboards	\$35, 25 min	Detail add-on.
Heavy pet hair	\$20, 20 min	Extra removal effort.

Base residential price: \$211.20
 Inside oven: +\$30
 Interior windows: $8 \times \$6 = +\48
 Heavy pet hair: +\$20
 Final price: \$309.20

Step 9: Estimated Time

Estimated time helps operations schedule the job and explains why larger or deeper jobs cost more.

Input	Value	Why it matters
-------	-------	----------------

Input	Value	Why it matters
Apartment base time	1.6 hours	Small-home baseline.
Condo base time	1.9 hours	Moderate-home baseline.
Townhouse base time	2.2 hours	Stairs and levels included.
Single family base time	2.5 hours	Larger-home baseline.
Bedroom time	+12 minutes each	Reset and surface time.
Full bath time	+18 minutes each	Detail-heavy room time.
Every 1,000 sqft	+42 minutes	Size-based time adjustment.

Single family base: 2.5 hours
 3 bedrooms: 36 minutes
 2 full bathrooms: 36 minutes
 1 half bathroom: 10 minutes
 1,800 sqft: $1.8 \times 42 = 75.6$ minutes
 Estimated standard time: 5.13 hours
 Deep clean multiplier: 1.45
 Estimated deep clean time: 7.44 hours

Step 10: Manual Review Rules

Input	Value	Why it matters
Max auto-quote size	3,500 sqft	Large homes may need walkthrough review.
Heavy condition review	Yes	Condition can vary too much for blind pricing.
Post-construction review	Yes	Dust and debris vary heavily.
Max add-ons before review	5	Many extras can change staffing and schedule.

Full Worked Example: Recurring Condo

Scenario:
 Home type: Condo
 Square feet: 1,200
 Bedrooms: 2
 Full bathrooms: 2
 Half bathrooms: 0
 Levels: 1
 Condition: Standard
 Service type: Recurring standard
 Frequency: Weekly
 Add-ons: Inside oven

Price:

Condo base: \$160
Sqft bracket: +\$30
2 bedrooms: +\$20
2 full bathrooms: +\$56
Levels: +\$0
Subtotal: \$266
Condition: x1.00 = \$266
Service type: x1.00 = \$266
Weekly discount: -\$31.92
After discount: \$234.08
Inside oven: +\$30
Final visit price: \$264.08

Estimated time:
Condo base: 1.9 hours
2 bedrooms: 24 minutes
2 full bathrooms: 36 minutes
1,200 sqft: 50.4 minutes
Inside oven: 25 minutes
Total estimated time: 4.16 hours

Full Worked Example: Deep Clean Single Family

Scenario:
Home type: Single family
Square feet: 2,400
Bedrooms: 4
Full bathrooms: 3
Half bathrooms: 1
Levels: 2
Condition: Heavy
Service type: Deep clean
Frequency: One-time
Add-ons: Fridge, oven, baseboards, heavy pet hair

Price:
Single family base: \$190
Sqft bracket up to 3,000 sqft: +\$120
4 bedrooms: +\$50
3 full bathrooms: +\$84
1 half bathroom: +\$16
2 levels: +\$20
Subtotal: \$480
Heavy condition: $\$480 \times 1.28 = \614.40
Deep clean: $\$614.40 \times 1.38 = \847.87
Add-ons: \$110
Final price: \$957.87

Estimated time:
Base time: 6.05 hours
Heavy condition multiplier: 1.35
Deep clean multiplier: 1.45
Adjusted time: 11.84 hours
Add-ons: 90 minutes
Final estimated time: 13.34 hours

Estimator note

This job should likely require manual review because it is heavy condition and includes several add-ons.

Practical Starting Template

Input	Value	Why it matters
Apartment base	\$140	Small-home default.
Condo base	\$160	Moderate-home default.
Townhouse base	\$175	Multi-level default.
Single family base	\$190	Larger-home default.
Minimum price	\$160	Protects small jobs.
Full bathroom add	\$28	Detail-heavy room pricing.
Heavy condition	1.28x	More effort and product.
Deep clean	1.38x	Detailed service multiplier.
Weekly discount	12%	Recurring maintenance incentive.
First-clean surcharge	15%	Protects first recurring visit.
Max auto-quote size	3,500 sqft	Manual review threshold.

Common Mistakes

- Pricing a deep clean like a recurring maintenance clean.
- Not charging enough for bathrooms.
- Forgetting first-clean surcharge for new recurring clients.
- Applying weekly discounts to one-time jobs.
- Ignoring heavy condition.
- Auto-pricing post-construction without review.
- Not adding time for add-ons.
- Sending a quote without checking estimated time on site.

Final Review Checklist

- Home type is correct.
- Square footage is realistic.
- Bedroom and bathroom counts are correct.
- Levels are correct.
- Condition is realistic.
- Service type matches client request.
- Frequency discount is appropriate.
- First-clean surcharge is applied when needed.
- Add-ons are selected and priced correctly.

- Estimated time on site makes sense.
- Manual review is triggered for large, heavy, or post-construction jobs.
